## Summary

I am a motivated and goal-oriented Junior QA Engineer with a technical foundation and a strong desire to grow in Software testing. I have good experience in manual testing, creating test cases, checklists, and bug reports. I have finished a course about QA engineering recently. I am still studying new tools for being the best QA specialist.

My goal is to get a job in a reputed company where I will be able to achieve success. I am sure that my new skills and knowledge as well as my great previous work experience, especially my extremely huge desire to develop as a specialist in the field of Quality Assurance will greatly benefit the company.

## Pet-Projects

- **Eldorado** - manual testing of functionality at the acceptance level; creating a checklist and bug reports
- **Slack** - creating a checklist for performing smoke testing
- **Trello** -testing of API by Postman
- **GoIT website** - Studying Website Requirement Specification documents; creating test cases according to Website Requirement Specification; bug reports based on executed test cases
- **MakeUp** -working with DevTools, analysis of requests, their methods, and statuses
- **SQL requests** -creation of SQL queries using the educational database with Dbeaver

## Work Experience

- **Employment Service**                           **Sep. 2014-Present**

  A head of the department in Letychiv
  - manage the process of providing quality services to customers
  - organize meetings with employers and partners to agree on ways of cooperation
  - lead, mentor, and manage a high-performing social team, fostering a collaborative and results-driven work environment
  - provide quality and effective services to customers
  - developed a set of filters for analyzing the proper functioning of the internal program. This enables quick and high-quality control over compliance with the technology of service provision and the accuracy of payments

- **Employment Service**                           **Jan. 2008-Aug. 2014**

  A deputy head of the department in Letychiv
  - carried out an analysis of the qualitative and quantitative characteristics of the markers of achieving results
  - monitored and controlled compliance with the technology of providing services to customers
  - advised customers of the employment service on the application of employment legislation
  - organized and conducted specialist training

- **Employment Service**                           **Sep. 2005-Dec. 2007**

  Specialist of the department in Letychiv
  - carried out individual reception of customers
  - provided job selection services to clients of the service
  - organized and conducted group meetings and trainings
  - advised customers of the employment service
